

Technical Features

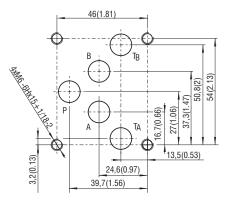

- High transmitted hydraulic power up to 350 bar with optimized design to minimize pressure drop
- > Five chamber housing design with reduced hydraulic power dependence on fluid viscosity
- > The valve is available with interchangeable DC solenoids, also for AC power supply using a built-in rectifier bridge
- > Wide range of solenoid electrical terminal versions available

Size 10 (D05) • Q_{max} 140 l/min (37 GPM) • p_{max} 350 bar (5100 PSI)

- > Wide range of interchangeable spools and manual overrides available
- CSA Certificate upon request 🏻
- > Inductive contactless Normally Open and Normally Closed spool position sensor option
- > Soft-shift spool speed control option
- $^{>}\,$ The coil is fastened to the core tube with a retaining nut and can be rotated by 90° to suit the available space.
- > In the standard version, the valve housing is phosphated and steel parts zinc-coated for 240 h salt spray protection acc. to ISO 9227
- > Enhanced surface protection for mobile sector available (ISO 9227, 520 h salt spray)

ISO 4401-05-04-0-05

Ports P, A, B, T - max ∅11.2 mm (0.44 in)

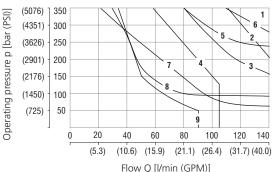

Technical Data

Valve size	10 (D05)				
Max. flow		l/min (GPM)	140 (37)		
Max. operating pressure at ports P, A, B		bar (PSI)	standard 350 (5080)		
Max. operating pressure at port T		bar (PSI)	210 (3050)		
Fluid temperature range (NBR)		°C (°F)	-30 +80 (·	-22 +176)	
Fluid temperature range (FPM)		°C (°F)	-20 +80	(-4 +176)	
Ambient temperature range		°C (°F)	-30 +50 (·	-22 +122)	
Supply voltage tolerance		%	AC: ±10	DC: ±10	
Max. switching frequency		1/h	15 000		
Switzbing times at 32 mars (156 SUS) ON		mc	AC: 30 40	DC: 30 40	
Switching time at $v=32 \text{ mm}^2/\text{s}$ (156 SUS)	OFF	ms	AC: 30 70	DC: 10 50	
Enclosure type acc. to EN 60529			IP65 / IP67 (see Dimensions, page 3		
Weight - valve with 1 solenoid - valve with 2 solenoids	kg (lbs)	3.9 (8.60) 5.4 (11.90)

For operating limits under conditions and flow directions other than shown contact our technical support. Admissible operating limits may be considerably lower with only one direction of flow (A or B plugged, or without flow.)

Seals

NBR

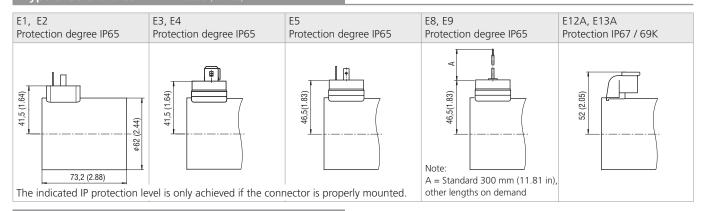

- For directional valves with two solenoids, one solenoid must be de-energized before the other solenoid can be charged.
- For AC voltage supply use coils with connector type E5.
- For other solenoid voltage supply options see data sheet C_8007.
- The solenoid operated valves are delivered without connectors. For available connectors see data sheet K_8008.
- Tightening torque is 14 Nm (10.3 lbf.ft).
- Besides the commonly used valve versions shown other special models are available. Contact our technical support for their identification, feasibility and operating limits. versions are available: consult our technical department for their identification, feasibility and operating limits.

Type of Solenoid Coil in millimeters (inches)

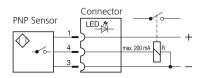

Manual Override in millimeters (inches)

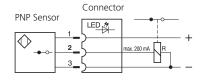

In case of solenoid malfunction or power failure, the spool of the valve can be shifted by manual override as long as the pressure in port T does not exceed 25 bar (363 PSI). For alternative manual overrides contact our technical support.

Spool Position Sensor

S1 - Circuit diagram of the normally - **OPEN** sensor

S4 - Circuit diagram of the normally - **CLOSED** sensor

Function of the position sensor:

In the basic position (when the solenoid is switched off), a steel core, connected to the spool, is under the position sensor. The sensor is activated, it means contacts of the sensor S1 are closed and contacts of the sensor S4 are open. After switching on the solenoid the spool with core moves out of the sensor range and the sensor is deactivated.

Technical Data of the Sensor		S1, S4
Rated power supply voltage	V	24 DC
Power supply voltage range	V	10 30 DC
Rated current	mA	200
Sensor enclosure protection (EN 60529)		IP67
Max. operating pressure	bar (PSI)	210 (3046)
Switching frequency	Hz	1000
Ambient temperature range	°C (°F)	-25 +80 (-13 +176)
Technical Data of the Connect	or	
Power supply voltage range	V	10 30 DC
Ambient temperature range	°C (°F)	-25 +80 (-13 +176)
Indicator		yellow LED

Typical configurations of the valve with a sensor:

3-position valve with two solenoids, equipped with two sensors

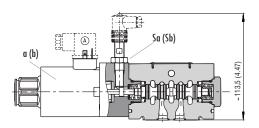

2-position valve with one solenoid, equipped with one sensor on the solenoid side

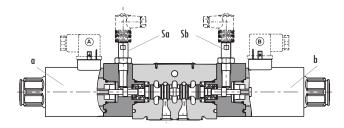

2-position valve with a detent assembly of spool, equipped with one sensor on the side of the solenoid which moves the spool from the basic position to the switched position according to the spool symbol **Note:** the sensor always indicates the change of spool position realised by the energised solenoid, mounted on the side of the sensor.
